GROWTH & UPLIFT

MUTUAL ACTION PL/

The bottom line.

Salesforce Commerce Cloud is a revenue-share model with layered per-seat and dev costs — powerful, but heavy for a small team. Shopify Plus is a flat, transparent base with most of what you need out of the box. Here's the gap, before we even count the growth upside.

EST. ANNUAL

\$1,010,650

3 yrs of savings less one-
time implementation

Salesforce figures are estimates to confirm on our Sept 10 call — Ron hasn't shared the revenue-share rate yet. Every input below is editable so we can true it up live. Currency: EUR converted to USD at ~1.08 for a like-for-like view with Shopify's USD pricing.

CURRENT STATE

Why you're looking.

What you told us

- **SFCC is too large & complex** for REPEAT's small team
- **Per-seat user fees** under Salesforce's newer policy are hefty
- Revenue-share pricing bundles platform, hosting, apps & dev — hard to see the true cost
- Priorities: **page-load speed, flexibility, reliability**, clean marketing/email integration, ERP integration, easy for a lean team

Where Shopify fits

- **Flat \$2,300/mo base** — no revenue share at your volume (VPF only above ~\$7.9M/yr)
- **~80% out of the box** — less custom dev, lighter load on your team
- **One admin** unifies your 8+ regional stores, marketplace orders & customers
- Deep app ecosystem (Klaviyo etc.) that connects natively, plus ERP integration via a partner

LIVE TCO MODEL

Salesforce today vs. Shopify Plus.

Edit any number — the page updates live. Salesforce lines default to industry estimates; we'll replace them with your real figures on the call.

THREE-YEAR PICTURE

Salesforce vs. Shopify Plus, cumulative.

SCENARIO	YEAR 1 (2027)	YEAR 2	YEAR 3	3 - YEAR TOTAL
Salesforce (stay)	\$555,000	\$555,000	\$555,000	\$1,665,000
Shopify Plus (incl. build in Yr 1)	\$251,450	\$201,450	\$201,450	\$654,350
REPEAT saves	+\$303,550	+\$353,550	+\$353,550	+\$1,010,650

Operating savings only — before the growth upside on the next tab. Salesforce lines are placeholders until we confirm your real revenue-share, seat and dev figures.

Pricing & stores.

PLUS BASE \$2,300/mo ~\$27,600/yr · flat at your volume	STANDARD CARD 2.25% + 30¢ 2.9% Amex · unlocks Shop Pay	STORES INCLUDED IO 1 main + 9 expansion, same brand
--	---	--

Variable Platform Fee — and your peak months

You pay the **higher of** the \$2,300 base or the VPF on that month's revenue. VPF (online) is **0.35%**, and only bites when a month's revenue exceeds ~\$657K. At ~\$4.5M/yr you're on the base almost every month — the one to watch is a **Black Friday / holiday spike**.

TYPICAL MONTH (~\$375K) \$2,300 Base applies · VPF would be ~\$1,313	STRONG MONTH (~\$700K) \$2,450 VPF 0.35% just edges above base	BFCM PEAK (~\$1M) \$3,500 VPF applies for that month only
---	---	--

Illustrative. So you're never blindsided: a very heavy peak month is the only time you'd pay above the \$2,300 base. Free months / custom offers are negotiable.

Card rates vs. your Adyen setup

CARD TYPE	SHOPIFY PAYMENTS	ADYEN (TODAY)	NOTE
Standard (Visa/MC)	2.25% + 30¢	~2.0% + €0.25	Adyen competitive in NL/DE
Amex	2.9% + 30¢	~ in line	—
Direct debit (iDEAL etc.)	via Shopify Payments	~€0.25	low fixed fee

CARD TYPE	SHOPIFY PAYMENTS	ADYEN (TODAY)	NOTE
Keep Adyen as gateway	+0.2% fee	—	no Shop Pay if third-party

Honest read: your Adyen rates are competitive, so raw processing is roughly at parity. The reason to move to Shopify Payments is **Shop Pay conversion + the Shop app + agentic checkout** (next tab) — not a lower headline rate.

Expansion stores

Your regional footprint — Dutch, German, French, two Swiss, US, UK and a generic EU-English store (~8 today, with Canada planned) — maps to **1 main store + expansion stores**, all the same REPEAT brand. **10 are included.** Beyond 10, each additional store is **~\$300/mo (~\$3,600/yr)** — or a revenue-share option; negotiable.

STORES	BEYOND INCLUDED 10	ADDED COST /YR
Today (~8–9)	0	\$0
Add Canada (~10)	0	\$0
Grow to 11	1	\$3,600

Apps & themes are billed per store. A separate brand (not REPEAT) would need its own Plus contract, not an expansion store.

WHY SHOPIFY — FOR REPEAT SPECIFICALLY

Built for exactly what you asked for.

Every priority you named maps to something Shopify does natively — and to a Salesforce pain it removes.

A lean team can run it

Your biggest frustration with Salesforce is that it's too complex for a small team. On Shopify, your team makes changes without a developer for every edit.

Multi-region, native

NL, DE, FR, two Swiss, US, UK and EU-English — plus Canada — via Shopify Markets + expansion stores, with home currency and language built in, on one platform subscription. Far less overhead than standing up each market separately.

Speed & reliability

A fast, fully-hosted storefront — page-load speed and reliability were top of your list, and they're the baseline here, not a project.

Marketing & email, connected

Klaviyo and your email tools plug in natively, with customer data in one admin — cleaner than routing everything through Salesforce Marketing Cloud.

Your ERP, integrated

Connect your ERP as the source of truth — orders and inventory flow without the heavy custom work Salesforce demands.

Flat, predictable cost

A base platform fee instead of Salesforce's revenue-share plus climbing per-seat charges — a cost line your partners can actually plan around.

Growth & uplift.

Cost parity is the floor. The real case for Shopify is revenue you don't get on Salesforce — starting with agentic commerce and Shop Pay. Figures below are illustrative on ~\$4.5M GMV; we'll tune them together.

EMPHASIS

Agentic storefront (AI channels)

Shopify's Universal Commerce Protocol syndicates your catalog to AI assistants (ChatGPT and beyond) — product discovery, cart and checkout happen *inside* the AI channel. **\$0 subscription; you pay only standard payment rates per sale.** A brand-new acquisition surface Salesforce doesn't natively offer.

ILLUSTRATIVE NEW-CHANNEL GMV

\$135,000

3% of GMV via agentic — editable

Shop Pay conversion

One-click checkout for 200M+ shoppers, with the highest checkout completion in Shopify's network. Less friction on a €258 AOV cashmere purchase = more completed orders — at your current 1.4–2.1% conversion, small lifts compound.

ILLUSTRATIVE UPLIFT GMV

\$450,000

Annual upside

Shop Pay uplift GMV **\$450,000**

Agentic channel GMV **\$135,000**

Incremental GMV / yr **\$585,000**

INCREMENTAL GROSS PROFIT **\$321,750**

Shop app marketplace

Your products surface to Shop app shoppers with related-store referrals — the #2 shopping marketplace behind Amazon.

High-intent audiences

Export Shopify-built high-intent customer lists into Google / Meta / TikTok — you pay on conversion.

Unification

All regional stores, marketplace orders and customer data in one admin — a real win for a lean team.

MUTUAL ACTION PLAN

No rush — live before your January 2028 renewal.

You're renewing Salesforce for one more year now (early January), so the next real decision point is your **renewal in January 2028**. That gives us room: this stays exploratory for now, with a **~6-month build starting around May 2027** to go live comfortably ahead of the renewal — no forced timeline.

NOW · DONE

TCO review

This model — I'll send it as a PDF for you to take to Repeat's management. Your real Salesforce figures plugged in; edit anything and I'll update.

NEXT FEW WEEKS

Socialize internally

Share the savings with management to weigh against the (understandable) reservations about another migration. Send me any questions or hesitations the team raises and I'll address them.

EARLY 2027

Decision + partner intros

If there's appetite, I introduce an implementation partner (I have one in mind) for exploratory conversations, scoping, and a real developer-cost read vs. Salesforce.

~ MAY 2027

Build begins (~6 months)

Storefront, regional/expansion stores, ERP + marketing integrations, catalog migration. B2B/wholesale can be a phase-2 expansion store.

LATE 2027

Go live on Shopify Plus

Live and stable well before the January 2028 Salesforce renewal — so the renewal decision is yours to make, not forced.

Immediate next step

Take it to your team. I'll send this as a PDF so you can share the savings with management. When you're ready, I'll set up an exploratory partner conversation — no pressure, no rush.

APPENDIX

Assumptions & inputs.

Annual GMV	€4.2M (~\$4.5M)	Your TCO data sheet · FX ~1.08
Orders / AOV	16,300 · €258	Your TCO data sheet
Conversion rate	1.4% – 2.1%	Seasonal, per your sheet
SKUs	5,000 active	Size-level, per your sheet
Salesforce rev-share	7% of NMV	Per Ron — gross less returns
Salesforce dev/agency	\$120K (est.)	Dedicated devs + custom setup — confirm
Plus base	\$2,300/mo	Verified · VPF 0.35% above ~\$7.9M/yr
Card rate	2.25% + 30¢ (2.9% Amex)	Shopify Payments · +0.2% for 3rd-party
Expansion stores	10 incl · \$300/mo beyond	Same brand only
Implementation	~\$50K (Ron: ~\$100K)	To refine with partner scope
