

The problem, how we'd solve it, and the numbers.

Centered on the problem statement you and Matt laid out — what's slowing True Spec's fitting operation, how Shopify POS solves it, and what it costs.

01 THE PROBLEM

True Spec runs 41 fitting locations — online on Shopify Advanced, in-store on ADS. The fitting workflow *is* the business, and today's stack puts friction right where revenue happens:

- **Spec capture lives off-system** — fitters log custom specs (length, swing weight, CPM, adapter, weights) in Google Sheets, then re-key them. Errors creep in; it's the reason ADS was built.
- **No single source of truth** on the customer across those systems.
- **A dated, stitched-together stack** — ADS + SKU Vault + Salesforce + ShipStation + Avalara + an external payment portal → phantom POs, manual split-shipments, double-ships, constant reconciliation.
- **No post-fitting payment link** — deals slip when a fitter can't reach a customer by phone after the fitting.

02 HOW WE'D SOLVE IT

- ▶ **Native spec capture on POS line items** — the Google-sheet workaround disappears (Chris Cote's Golf runs exactly this on Shopify POS), and POS v11 is ~73s faster per complex cart.
- ▶ **Text/email payment link in <30s** — recover the post-fitting deals that slip today.
- ▶ **Fitting + checkout in one system** — ends phantom POs, double-ships, and manual reconciliation; one customer record, cleaner reporting.
- ▶ **Lower card rates + POS Pro on every location** — the cost wins, below.

Why Plus, and why it's low-lift: POS Pro is included on Plus at every location — à la carte that's ~\$89/mo per store (~\$44K/yr across your 41), so the \$2,300/mo Plus license already covers POS everywhere at the lowest card rates. And True Spec is already on Shopify Advanced, so it's a familiar upgrade — same platform, more included. ADS keeps running throughout; the migration is phased: **upgrade Advanced → Plus → stand up POS for fitting (read-only sync to ADS / SKU Vault) → pilot a few locations side-by-side → roll out across all 41 at your pace.**

+ NEW IN SPRING '26 POS — GROWTH ON TOP

- ▶ **Endless aisle / ship-to-customer** — sell any club, head, or shaft from the full catalog and ship it when a location's out of stock. Capture the walk-out sale.
- ▶ **Online → in-person via Shop app** — send local Shop shoppers to the nearest store; online demand becomes foot traffic.
- ▶ **Tap to Pay across locations** — contactless payment on a phone anywhere on the floor; also trims the hardware bill.
- ▶ **Returns & exchanges in one cart** — handle a refund, exchange, and new sale together, keeping the customer in the chair.

03 THE MONEY

Illustrative model — figures use industry benchmarks and what you shared on our calls. Tell me which numbers to swap in (below) and the math holds.

ANNUAL COST	TODAY (ADVANCED + ADS)	SHOPIFY POS (PLUS)
Card processing (~\$19.5M volume)	\$565,500 @2.9%	\$487,500 @2.5%
Platform license (Plus adds POS Pro, all 41)	\$4,800 Advanced	\$27,600 Plus
ADS dev + server (backend)	\$60,000	\$30,000 reduced
Annual operating total	\$630,300	\$545,100
Recurring operating savings / yr		+\$85,200
+ One-time: implementation (setup + ADS integration)	—	\$30,000
+ One-time: POS hardware (~58 fitters)	—	\$11,000

OPERATING SAVINGS / YR		REVENUE LIFT / YR (conservative)	
Card processing (2.9% → 2.5%)	+\$78,000	Recovered post-fitting deals via payment links	+\$75,000
ADS dev/server reduced ~50%	+\$30,000	Endless aisle — ship out-of-stock from full catalog	upside
Ops time — 10 hrs/wk (Cote's, @\$40/hr)	+\$20,800	Faster checkout → more fitting capacity	upside
Less: incremental license (Advanced → Plus)	-\$22,800	Cote's Golf: ~50% less custom-order processing time on this workflow.	
Net recurring savings	≈ \$106,000		

NET RECURRING SAVINGS ~\$106K/yr Operating, before revenue lift	YEAR-1 ONE-TIME COST ~\$41K \$30K setup + \$11K hardware	PAYBACK ~5 mo Savings cover implementation
---	--	--

If it's worth a look: let me know which numbers to swap in — current ADS cost, card rate + payment-portal fees, and your annual card volume — and we can review the real TCO together.
