The bottom line.

ANNUAL OPERATING SAVINGS ⓘ

\$475,200

Recurring, Years 2-3

3-YEAR NET BENEFIT ⓘ

\$1,096,100

After Year 1 implementation

PAYBACK PERIOD ⓘ

~8 mo

From go-live

Current state.

- **Magento is getting more expensive every year.** 10+ years of custom code. Every site change needs a developer.
- **NetSuite + NewStore go live in August, with Shopify following.** If those slip, the late-January 2027 launch holds either way.
- **Launching January 2027 captures a full year of savings.** Push it later and that upside slips to 2028.

Full data set, monthly GMV breakdown, stack inventory, and source for every number → **Appendix** tab.

LIVE TCO MODEL

Magento today vs. Shopify Plus.

Edit any number. The page updates live.

PROCESSING — ALREADY SAVING

Shopify Plus list rates (**2.25% standard · 2.95% Amex**) are lower than Catbird's go-forward Stripe benchmark (**2.35% standard · 3.19% Amex**). Catbird saves on every transaction from day one — before any other lever.

License

BASE \$2,300 / mo 3-year commit	VPF — APPROVED ✓ 0.30% Online rate secured — down from 0.35% standard	CATBIRD AT \$50M \$150K / yr at 0.30% — was \$175K at 0.35%
--	--	--

What the 0.30% approval means

We secured online VPF approval at **0.30%** — a 0.05-point cut from the 0.35% standard, or roughly **14% off your variable platform fee**. Because VPF is charged on GMV, the dollar savings grow every year Catbird grows. This approval is **valid through July 30, 2026**.

Today — \$50M GMV (2025 actual) \$25,000 / yr \$150K at 0.30% vs \$175K at 0.35%.	Projected — \$55M GMV (2026 plan) \$27,500 / yr \$165K at 0.30% vs \$192.5K at 0.35%.	Over the 3-year commit ~\$80K+ Cumulative, assuming modest GMV growth across the term.
--	--	---

The rate holds as you scale: every additional \$10M in annual GMV widens the gap by another **\$5,000/yr** vs the standard 0.35% — so the faster Catbird grows, the more this concession is worth.

Card processing

Standard (Visa / MC / Discover) 2.25% + 30¢ 84% of Catbird's volume.	Amex / commercial 2.95% + 30¢ 16% of Catbird's volume.
---	---

vs. your Stripe go-forward rates

CARD TYPE	SHOPIFY PAYMENTS	YOUR STRIPE RATE	DELTA
Standard (Visa / MC / Discover)	2.25% + 30¢	2.35%	-0.10%
Amex / commercial	2.95% + 30¢	3.19%	-0.24%

Lower on **both** card types than your Stripe go-forward rate — roughly **\$60K/yr less** on \$50M at your 84/16 mix. This processing advantage is **already reflected in the \$450K/yr TCO savings**; the Shop Pay conversion lift and automated reconciliation stack on top.

Secured incentive

Approved this quarter — **valid through July 30, 2026.**

VPF reduction — secured ✓

Approved at **0.30%**, down from the 0.35% standard — the lever Catbird flagged as most impactful on the 6/23 call.
Compounds as GMV grows (see "What the 0.30% approval means" above).

Working backward from a January 2027 launch — fully live for Valentine's Day.

**WK OF JUN 17 · THIS
WEEK**

TCO model review

Today's call: walk through the model. Confirm assumptions and align on the decision framework for partner selection.

WK OF JUN 24

Internal review · partner selection criteria locked

Catbird shares the TCO model + partner shortlist internally. Decision criteria locked: financial fit, configurator confidence, NetSuite integration. Reference checks complete.

MON JUL 6 · TODAY

Final pricing shared

Shopify presents final pricing — \$2,300/mo base + the approved 0.30% VPF, for Catbird's commit term and GMV band.

YOUR GREEN LIGHT

Green light on pricing

Once Catbird confirms the pricing works, we proceed. Shopify holds all paperwork until this go-ahead — nothing drafted before you're comfortable.

THIS WEEK · CATBIRD

Letter of Intent + Shopify account

Sign a non-binding Letter of Intent (sent via DocuSign) confirming the Shopify products Catbird plans to use — and create the Shopify account so Shopify can send the contract through it.

ON YOUR GO-AHEAD**Shopify sends the contract**

Once pricing is green-lit and the account is created, Shopify drafts and sends the contract to Catbird's Shopify account. We don't draft until you give the go-ahead.

WK OF JUL 8**Partner decision · paid assessment kickoff**

CQL / Lazer / Domaine decision finalized. Selected partner kicks off paid discovery (4–6 weeks). Validates configurator + NetSuite + data migration.

THROUGH JUL 30**Contract review**

Catbird legal + finance review runs through Jul 30. Terms are standard — Shopify doesn't redline — so this window is about internal comfort, not negotiating language. PE board notification (if required) lands here, followed by internal sign-off and signature prep.

WED JUL 30 · TARGET**Contract signed ✓**

Contract executed by Catbird's authorized signer (same signer as the LOI). Shopify account team assigned. Selected partner moves from paid assessment into full build.

Post-close — build to launch

2ND WK OF AUG**NetSuite + NewStore cutover**

ERP + POS replatforming completes — Shopify build picks up from here on the planned sequence. If this cutover slips, the Shopify track keeps moving in parallel rather than waiting, protecting the late-January launch. SuperSync middleware gets tested in production once NetSuite is live.

AUG – DEC 2026

Build phase · ~17 weeks

Theme, configurator framework, NetSuite + SuperSync, data migration (27,045 SKUs + customer records), native promotions, SEO migration with 301 redirects. Avoids the late-July sale and Q4 retail peak by design.

JAN 2027

UAT · pre-launch QA

End-to-end testing. Payment + tax + 301 validation. 2 weeks of partner hypercare locked for go-live.

**LATE JAN 2027 · PRE-
VALENTINE'S**

Go-live ✓

Public launch ahead of Valentine's. Full 2027 efficiency cycle captured. Annual savings begin compounding.

Q1 2027 FAST-FOLLOW

Loyalty + post-launch enhancements

Okendo, Rebuy, A/B testing, heatmapping, visualization tools layered in per Catbird's confirmed roadmap.

APPENDIX

The full data set behind the model.

Every number Catbird shared, every Shopify list-rate, and every source. Use this tab to verify any input in the calculator or to cross-check assumptions before circulating internally.

CATBIRD PROFILE — CONFIRMED DATA

What we're sizing this model for.

Every number below comes from Catbird's TCO Discovery sheet (filled in by Catbird) or the Lazer SOW. Hover the info icons for source detail.

ACTIVE SKUS 27,045 644 configurable · 26,338 simple	AOV (ONLINE) \$325 Per TCO Discovery sheet	MONTHLY SESSIONS 740K Per month	ACTIVE CUSTOMERS (12MO) 6.2M Last 12 months
CONVERSION RATE 1.3% Updated from sheet	CUSTOMIZABLE JEWELRY SHARE 16% Confetti · Memento · engraving	CART ABANDONMENT 65% ~19K abandon / month	AMEX MIX 16% / 84% Amex / standard

Monthly online GMV — last 12 months ⓘ

PERIOD	JUN '25	JUL '25	AUG '25	SEP '25	OCT '25	NOV '25	DEC '25
GMV	\$2.43M	\$5.27M	\$3.53M	\$3.13M	\$4.29M	\$10.04M	\$7.82M

PERIOD	JAN '26	FEB '26	MAR '26	APR '26	MAY '26	TOTAL LTM	2025 ECOM
GMV	\$2.62M	\$2.62M	\$2.70M	\$3.08M	\$3.41M	~\$50.9M	~\$50M

Read the seasonality: Nov–Dec drives ~36% of annual GMV (Nov \$10M, Dec \$7.8M). Q1 (post-Valentine's) runs below baseline. **Plus migration timed for late Jan 2027 captures the full 2027 peak cycle** — pre-Valentine's drop drives initial volume, then Nov–Dec 2027 hits on the new platform.

The stack to integrate ⓘ

- **ERP:** NetSuite (in flight — replacing Teamwork CHQ)
- **POS:** NewStore (in flight — replacing Teamwork POS) · cutover 2nd week of August 2026
- **Middleware:** SuperSync (NetSuite ↔ Shopify integration)
- **Email / SMS:** Klaviyo · Attentive (both retain on Shopify)
- **Search:** Searchspring today — Shopify S&D TBD
- **Reviews / UGC:** Yotpo
- **Fraud:** Forter (future TBD)
- **Gift cards:** Teamwork → Clutch (in flight)
- **Customer service:** Kustomer
- **Loyalty:** None today — Q1 post-launch fast-follow per Catbird (Okendo, Rebuy, A/B, heatmapping, visualization tool)

KEY ASSUMPTIONS

Every number, every source.

The full input layer behind the model. Catbird-specific data is from the intro discussion and partner discussions. Shopify pricing is from the published US rate card. Magento numbers are placeholder estimates pending Catbird's confirmation.

2025 online GMV	\$50M	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Aligns with Catbird discussion: "in 25 we finished just under 50 million."</i>
2026 planned GMV	\$55M (+10%)	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Per Catbird discussion: "10% over that \$49M in 2026 alone."</i>
AOV (online)	\$325	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Updated from \$312 baseline in Lazer SOW.</i>
Conversion rate	1.3%	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Updated from 1.52% baseline.</i>
Monthly sessions	740,000	<i>Catbird TCO Discovery sheet, confirmed by Catbird.</i>
Active customers (LTM)	6.2M	<i>Catbird TCO Discovery sheet, confirmed by Catbird.</i>
Cart abandonment rate	65%	<i>Catbird TCO Discovery sheet, confirmed by Catbird. ~19K users abandon per month — biggest single revenue-lift opportunity on Plus.</i>
Amex mix	16% Amex / 84% std	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Lower than typical fine-jewelry mix — favorable for processing costs.</i>

Magento license + hosting	\$165,000	<i>Catbird TCO Discovery sheet, confirmed by Catbird.</i>
Magento dev agency (annual)	\$450,000	<i>Catbird TCO Discovery sheet, confirmed by Catbird. Includes in-house dev + maintenance (bundled per Catbird's note).</i>
Magento apps + extensions	\$84,000	<i>Catbird TCO Discovery sheet, confirmed by Catbird.</i>
Plus base license	\$2,300 / mo	<i>Shopify Plus published US rate card. 3-year commit pricing.</i>
Plus VPF rate	0.30% (approved)	<i>Approved online concession — 0.30%, down from the 0.35% published rate. Merchant pays higher of base × 12 or VPF × annual GMV.</i>
Shop Payments standard rate	2.25% + 30¢	<i>Shopify Plus US rate card. Card-not-present standard.</i>
Shop Payments Amex / commercial	2.95% + 30¢	<i>Shopify Plus US rate card. Premium card category.</i>
Magento agency reduction on Plus	- 75%	<i>Conservative model. Plus customers typically reduce external dev agency spend 70-90% post-migration as marketing and ecom teams self-serve via admin.</i>
Active SKU count	27,045	<i>partner evaluation discussions: 644 configurable + 26,338 simple.</i>
Customizable jewelry share	16% of revenue	<i>partner evaluation discussions. Includes Confetti, Memento, engraving products.</i>

Lazer implementation cost	\$329,500	Catbird × Lazer SOW: \$289,500 build + \$40,000 discovery (added 6/23 call). 17-week build.
CQL implementation cost	~\$240K	Per Catbird: "CQL came in the lowest." Exact total not yet shared.
Domaine implementation cost	~\$425K	Per Catbird: "Domain came in significantly higher." confirmed during partner evaluation they are the most costly.
NetSuite + NewStore cutover	2nd week of Aug 2026	Catbird TCO Discovery sheet, confirmed by Catbird. Slightly later than originally scoped (was mid-July to mid-August).
Target commercial agreement date	By Jul 30, 2026	Target signature date to hit the January 2027 go-live; aligns with the approved 0.30% VPF, valid through July 30, 2026.
Agency selection target	2–3 weeks from Jun 10	Catbird TCO Discovery sheet, confirmed by Catbird. CQL / Lazer / Domaine decision late June.
Shopify migration go-live	Late January 2027	Catbird call: "objective is to launch the Shopify migration in January 2027 to capture efficiency gains throughout that year." Pre-Valentine's window.

LIVE VPF CALCULATOR

Variable Platform Fee — at any GMV.

Plus charges the **higher** of two amounts: a flat base license (\$2,300/month) or a percentage of monthly GMV (0.30% — Catbird's approved online rate, down from the 0.35% standard). At low GMV the base applies. As revenue grows, VPF takes over. Adjust the inputs to see how the math plays out at any volume.

\$10M+ ANNUAL ·
CATBIRD'S BAND

VPF scales
linearly

At \$50M: \$150K/yr. At
\$100M: \$300K/yr. Rate stays
at 0.30% no matter how big.

Why this is good news for Catbird: the rate stays at 0.30% (Catbird's approved online rate, down from the 0.35% standard) as Catbird scales. You pay more in absolute dollars because you're selling more — but the percentage never moves against you. Most enterprise platforms scale their cut as you grow. Plus doesn't.

License cost at sample GMV bands
