

Shopify POS for True Spec — the numbers.

What Shopify POS delivers for your current 41-location fitting operation, where the operational savings and revenue lift come from, and what it costs — all in one place.

Illustrative model. Figures below use industry benchmarks and the numbers shared on our calls; they firm up the moment you send your ADS costs, card rates, and volumes (listed at the bottom). Structure and methodology are the point — swap in your actuals and the math holds.

WHY SHOPIFY POS FOR YOUR CURRENT SETUP

- ▶ **Native spec capture** on POS line items — length, swing weight, CPM, adapter, movable weights — no Google-sheet workaround.
- ▶ **Text/email payment link** in under 30s — recover deals fitters can't close by phone post-fitting.
- ▶ **Lower card rates** on Plus + Shopify Payments vs. an external payment portal.
- ▶ **~73 seconds faster** per complex cart (Spring '26 POS v11) — fitter throughput, not friction.
- ▶ **One admin for all four brands** via Multi-Entity Selling — kills phantom POs, double-ships, manual reconciliation.
- ▶ **One source of truth** on the customer + clean cross-brand reporting.

TOTAL COST OF OWNERSHIP — TODAY VS. SHOPIFY POS (ANNUAL)

LINE ITEM	TODAY (ADS STACK)	SHOPIFY POS (PLUS)
Card processing (~\$19.5M card volume)	\$565,500 @2.9%	\$487,500 @2.5%
Platform license	\$14,400 Advanced ×3	\$27,600 Plus, all-in
ADS dev + server (backend)	\$60,000	\$30,000 reduced
Annual operating total	\$639,900	\$545,100
Recurring operating savings / yr		+\$94,800
+ One-time: implementation / Boston POC	—	\$30,000
+ One-time: POS hardware (tablets + readers, ~58 fitters)	—	\$11,000

Card rate and ADS cost are the two biggest variables and the first things we confirm. POS hardware is one-time; the Boston POC needs only a handful of devices, not all 58 on day one.

WHERE IT PAYS OFF

OPERATING COST SAVINGS / YR

Card processing (2.9% → 2.5%)	+\$78,000
ADS dev/server reduced ~50%	+\$30,000
Ops time — 10 hrs/wk recovered (Cote's benchmark, @\$40/hr)	+\$20,800
Less: incremental license (Advanced ×3 → Plus)	-\$13,200
Net recurring savings	≈ \$115,600

REVENUE LIFT / YR (conservative)

Recovered post-fitting deals via payment links (~0.5% of ~9,750 fittings @ ~\$2K)	+\$75,000
Endless aisle — ship out-of-stock items from the full catalog	upside
Faster checkout → fitter capacity for more fittings	upside
Shop Pay conversion lift on the 3 ecom brands	TBD on GMV

Cote's Golf saw ~50% less custom-order processing time after moving this workflow to Shopify POS with CQL.

NEW IN SHOPIFY POS (SPRING '26) — BUILT TO GROW IN-STORE REVENUE

- ▶ **Endless aisle / ship-to-customer** — sell any shaft, head, or club from the full catalog and ship it when a location is out of stock. Capture the sale instead of losing it to "we don't carry that here."
- ▶ **Fastest-ever POS (v11)** — saves 60+ seconds per checkout / customer-create; more fittings per fitter per day = more revenue capacity at peak.
- ▶ **Online → in-person via Shop app** — route local Shop shoppers to the nearest location for pickup and returns; turn online demand into store visits.
- ▶ **Quick Sale — payment links + shipping** — the post-fitting payment link (Matt's #1) now takes payment and shipping in one flow, closing deals after the customer leaves.
- ▶ **Tap to Pay across locations (Plus)** — take contactless payment on a phone anywhere on the floor at all 41 locations, and trim the hardware bill (no reader needed for a tap).
- ▶ **Multi-entity across retail (Plus)** — run all four brands' locations from one store; the consolidation that removes the reconciliation drag.

BOTTOM LINE

NET RECURRING SAVINGS

~\$115K/yr

Operating, before revenue lift

YEAR-1 ONE-TIME COST

~\$41K

\$30K POC + \$11K hardware

PAYBACK

~4–5 mo

Savings cover the build in under half a year

To replace the estimates with your real numbers (Matt): current ADS cost (monthly fees, POS vs. backend, dev/server) · card processing rate today + external payment-portal fees · annual card volume through fitting/POS · ecom GMV for Fairway Jockey, Mirror & McLaren · whether the four brands are separate legal entities or roll up under EB Golf Media LLC · apps in the Advanced stores to carry over.

NEXT STEPS

- ▶ **Reference call** — Chris Cote's Golf / CQL, same fitting workflow, to hear the build and results firsthand.
- ▶ **Architecture session** — Shelby + your developer to scope the self-contained Boston POC (read-only stubs to ADS/SKU Vault/Salesforce).
- ▶ **TCO v2** — your inputs above → a locked side-by-side you can take to leadership.
- ▶ **Target** — Plus signature by end of Q3, Boston POC in Q4 2026, side-by-side vs. ADS in Q1 2027.
