

MUTUAL ACTION PLAN · PREPARED BY NICOLE DEGENNARO, SHOPIFY

# Sigma Pharmaceuticals x Shopify Plus

Getting Sigma live on Shopify Plus — clearing the Restricted Categories Program in parallel with scoping the build with our partner, Simplistic. This is our shared plan: who does what, and what's next.

Plan: **Shopify Plus**

Category: **Restricted — wholesale pharma distribution**

Partner: **Simplistic**

Sigma lead: **Nichole Moreau**

## WHERE WE ARE

### Two tracks, running in parallel.

Sigma is a **wholesale pharmaceutical distributor** moving onto Shopify Plus. Because pharma is a regulated category, two things run side by side: **(1) eligibility** — clearing Shopify's Restricted Categories Program — and **(2) the build** — scoping the storefront with Simplistic. Neither has to wait entirely on the other, but **program approval is the gate to go live**.

#### ✓ Momentum

Discovery done, supportability review underway, and the Due Diligence Questionnaire (DDQ) is complete and being submitted to the program.

#### 🔑 The gate

Approval into the Restricted Categories Program — driven by the DDQ, accreditation/licensing, and supportability review. Spots are limited, so timing matters.

#### 🚀 In parallel

Kick off scoping with Simplistic so the build is ready to move the moment eligibility clears — no time lost.

---

## THIS CALL

### Agenda for today.

#### Sigma × Shopify — working session **TODAY**

1. **DDQ submitted → what happens next.** Confirm the questionnaire is in, and walk the Restricted Categories Program review: what the team evaluates, and expected timing.
  2. **Restricted-program next steps.** Line up any remaining accreditation/licensing items and close out the supportability review so nothing stalls approval.
  3. **Start scoping with Simplistic.** Introduce the partner and set a working session to scope the wholesale storefront (accounts, catalog, pricing, ordering) — in parallel with eligibility.
  4. **Timeline & owners.** Agree target dates and who owns each open item (below).
-

## THE PLAN

### Milestones, owners & status.

■ Eligibility track ■ Build track

#### Discovery & Shopify resource intro ELIGIBILITY

Reviewed Sigma's model (wholesale distribution, not online pharmacy) and the fit for Shopify Plus.

Shopify · Sigma DONE

#### Due Diligence Questionnaire (DDQ) completed ELIGIBILITY

Nichole completed the DDQ, noting wholesale-distributor equivalents where the form assumed an online-pharmacy model. Nicole is submitting it to the program.

Sigma (Nichole) → Shopify (Nicole) SUBMITTED THIS WEEK

#### Supportability review — sigmapharmaceuticals.com ELIGIBILITY

Standard site/product review for the category; close out any open items so it doesn't hold up approval.

Shopify supportability · Sigma IN PROGRESS

#### Accreditation & licensing ELIGIBILITY

Provide wholesale-distribution accreditation and state/federal licenses that support the program application.

Sigma (Nichole) IN PROGRESS

#### Restricted Categories Program — approval ELIGIBILITY

Shopify reviews the DDQ + accreditation + supportability and approves Sigma into the program. **This is the gate to launch** — we'll confirm the timeline on today's call.

Shopify (program team) THE GATE

4

**Scoping kickoff with Simplistic** BUILD

Partner intro + working session to scope the wholesale storefront: company accounts, catalog, customer-specific pricing, ordering workflow, and any integrations. Runs in parallel with eligibility.

Simplistic · Sigma · Shopify

NEXT — SCHEDULE FROM THIS CALL

5

**Scope, plan & pricing confirmed** BUILD

Simplistic delivers the build scope/estimate; confirm the Shopify Plus plan and commercial terms.

Simplistic · Shopify · Sigma

UPCOMING

6

**Build** BUILD

Simplistic builds the storefront on a Plus development store — ready to launch as soon as the program approval lands.

Simplistic

UPCOMING

7

**UAT & launch** BUILD

Test, sign off, and go live on Shopify Plus once eligibility is cleared and the build is approved.

UPCOMING

## TO KEEP THIS MOVING

### What we need from Sigma.

- **Remaining accreditation / licensing docs** — anything still outstanding for the program application.
- **Close the supportability items** — a quick pass on any flags for [sigmapharmaceuticals.com](https://sigmapharmaceuticals.com).
- **~60 minutes for the Simplistic scoping session** — pick a time (a week or two out is fine) so the build can start in parallel.
- **A point person for the build** — who Simplistic works with day-to-day on data, catalog, and sign-off.

**The honest read:** the two levers that set the go-live date are the **Restricted Categories Program approval** (eligibility) and getting **Simplistic scoping started**. Running them in parallel — rather than waiting for approval before scoping — is how we keep the timeline tight without rushing the regulated pieces.

Mutual Action Plan for Sigma Pharmaceuticals · prepared by Nicole DeGennaro, Shopify. Sigma is a wholesale pharmaceutical distributor; Shopify's Restricted Categories Program review (DDQ, accreditation, and supportability) governs eligibility and timing, and approval is required prior to launch. Implementation scope and pricing are finalized with the implementation partner (Simplistic) and confirmed on the order form.
